# **INSTRUCTION FOR INLINE ROBOHANDLE**

# Medium Size InLine RoboHandle for tool diameter between 7/8" to 1" This handle is for brooms, dustpans, push brooms, golf clubs, and etc.

#### Using two hose clamps to secure existing tool poles.

- Open two hose clamp attached on the InLine RoboHandle.
- Snap fit the InLine RoboHandle to the existing circular tool pole having diameter between 7/8" to 1".
- Tighten two hose clamps very tightly.
- Put your hand through the ring and grab the pistol grip to maneuver your hand tool.

#### Using screws to secure existing tool poles permanently.

- Pullout the two hose clamp out of the InLine RoboHandle.
- Snap fit the InLine RoboHandle to the exiting circular tool pole having diameter between 7/8" to 1".
- Using eight #6 sheet metal screws (not included), secure the InLine RoboHandle on the existing tool pole. Insert four screws on each side on the counter sink holes on the side of the InLine RoboHandle.
- Put your hand through the ring and grab the pistol grip to maneuver your hand tool.

# Large Size InLine RoboHandle for tool diameter between 1" to 1.4" This handle is for gardening tools, snow shovels, fishing tools, and etc.
